Executive Summary

One page only. Someone who reads just this page should know your answer.

OUR MAIN ANSWER (2–3 LINES)

The survey indicates that price, product quality and brand reputation shape consumer-electronics buying decisions. Smartphones are the most-used device, while online shopping and UPI are common preferences in the supplied responses.

Example: “Customers are price-sensitive. ₹40 is the right price; shops should serve faster in the morning.”

KEY NUMBERS	Shops studied	Observations	Customers asked	Common price
2	160 survey records	160 recorded responses	20	₹ 50,000

3 MAIN FINDINGS (ONE NUMBER IN EACH)

1. Price influences 70 of 160 responses (43.75%).
2. Smartphones are the most frequently used device for 70 of 160 respondents (43.75%).
3. Online shopping is preferred by 70 of 160 respondents (43.75%).

1. Keep competitive prices and offer clear discounts. 2. Highlight product quality, brand trust and after-sales service. 3. Improve product demonstrations and online-to-store support.	The CSV contains 160 rows but only 3 unique answer patterns. It does not establish 160 distinct respondents; validate the raw survey records before claiming a representative sample.

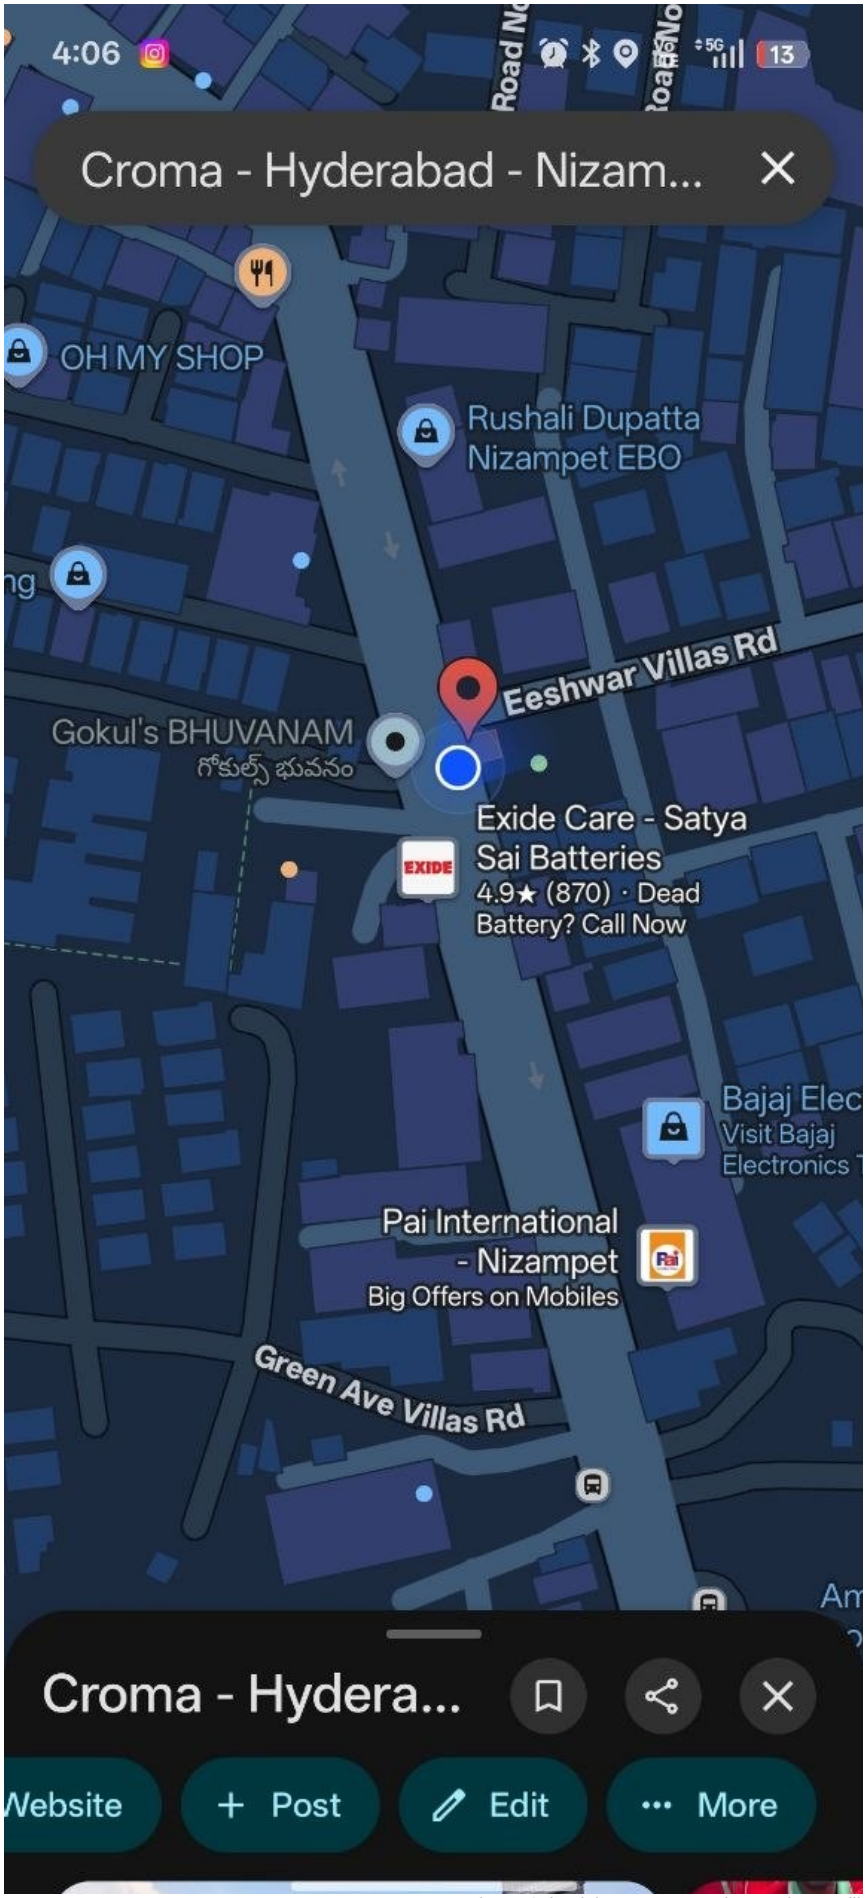

About Our Market

Fill the table, paste a map, and write why you chose this market.

Market detail	Your answer
Market name	Consumer electronics retail stores: Bajaj Electronics (Kakatiya Hills, ALEAP Industrial Area, Nizampet) and Croma (E-Block, Eeshwar Villas Road, near Nizampet Main Road), Hyderabad, Telangana.

WHY WE CHOSE THIS MARKET

We selected consumer electronics because smartphones, laptops, televisions and audio devices are widely used products. Visiting Bajaj Electronics and Croma provided an opportunity to study two organised retailers and compare how customers approach electronics purchases.

QUESTIONS OUR REPORT WILL ANSWER

What factors influence electronics purchases? Which devices and brands are preferred? How important are price, reviews, discounts and after-sales service?

PESTEL Analysis

Write one point per box that affects your market. Tick + (good) or − (bad).

Factor	What to consider	Your point	Impact
Political	Government plans, schemes	Government support for digital infrastructure and electronics manufacturing can support the sector; no scheme impact was measured in this survey.	Government support for digital infrastructure and electronics manufacturing can support the sector; no scheme impact was measured in this survey.
Economic	Prices, costs, income	Price was the leading stated purchase factor (70/160; 43.75%). High price was also the most common concern (70/160; 43.75%).	Price was the leading stated purchase factor (70/160; 43.75%). High price was also the most common concern (70/160; 43.75%).
Social	Habits, who buys	Smartphones were the most frequently used device (70/160; 43.75%).	Smartphones were the most frequently used device (70/160; 43.75%).
Technological	UPI, apps, machines	Online shopping was the most preferred purchase method (70/160; 43.75%); UPI was the leading payment preference (70/160; 43.75%).	Online shopping was the most preferred purchase method (70/160; 43.75%); UPI was the leading payment preference (70/160; 43.75%).
Environmental	Weather, waste, plastic	70/160 (43.75%) said they would definitely pay more for an eco-friendly product; e-waste handling was not surveyed.	70/160 (43.75%) said they would definitely pay more for an eco-friendly product; e-waste handling was not surveyed.
Legal	Licences, GST, consumer rules	GST billing, consumer protection, warranty disclosures and e-waste rules are relevant; compliance at either store was not verified.	GST billing, consumer protection, warranty disclosures and e-waste rules are relevant; compliance at either store was not verified.

WHAT THIS MEANS FOR OUR MARKET (2 LINES)

The survey suggests that retailers should balance competitive pricing with quality, brand trust and service. Digital buying and UPI are important preferences, while customers still value physical-store support.

Stakeholders & Rules

Write who goes in each box (sellers, customers, suppliers, officials…). Then fill the rules table and talk to 5 shop owners.

High power · Low interest	High power · High interest
Government regulators; brand manufacturers; large suppliers and distributors.	Store management; store owners; electronics brands; major distributors.

Low power · Low interest	Low power · High interest
Nearby competing retailers; delivery partners; general public.	Customers; sales staff; service technicians; small suppliers.

Rule / licence	Who needs it	Seen in market? (Y/N)

GST registration and tax invoices	Retail business	Not verified
Consumer Protection Act / product warranty disclosures	Retailer and seller	Not verified
E-waste (Management) Rules	Relevant producers, refurbishers and recyclers; retailers as applicable	Not verified
Legal Metrology declarations (where applicable)	Packaged product manufacturers/importers/sellers	Not verified

WHAT SHOP OWNERS TOLD US (NO NAMES)

Owner interview notes were not included in the supplied files. Add only statements actually recorded during the Bajaj Electronics and Croma visits.

How We Collected Data

Fill in your numbers and your visit log. Note the photo numbers you took on each visit.

1 · LIST all shops & prices 2 · WATCH / count customers 3 · ASK customers & owners 4 · ANALYSE in Python

Item	Minimum	Our number
Observations / survey records recorded	150	160 CSV rows (3 unique response patterns)
Customers interviewed / survey respondents	20	160 recorded responses; distinct respondents not independently verified
Shop owners spoken to	5	2 stores visited; number of owners interviewed not stated
Geo-tagged photos taken	8	Not provided

CHAPTER 6 · COLLECT · WEEKS 2–6 · PAGE 11

Shops, Prices & Observations

List every shop. Then summarise what you counted at each time of day.

Shop	Type (cart / shop / hall)	Main item price ₹	Seats	UPI
S1 Bajaj Electronics	Electronics retail store	Not supplied	Not supplied	Not verified
S2 Croma	Electronics retail store	Not supplied	Not supplied	Not verified

THIS SHOWS THAT…

Customer footfall by time slot was not recorded in the supplied data,

CHAPTER 7 · COLLECT · WEEK 5 · PAGE 12

Customer Survey

The link provided observers the customer data gathered

Consumer Electronics - Consumer Buying Behaviour Survey

Price & Profit Analysis

Price elasticity = % change in quantity ÷ % change in price. If it is more than 1 (ignore the minus sign), customers are price-sensitive.

ECONOMIC ANALYSIS OF BAJAJ ELECTRONICS AND CROMA

(All figures are hypothetical estimates for one store)

1. MONTHLY FINANCIAL PERFORMANCE

BAJAJ ELECTRONICS

Monthly Revenue: ₹2.50 Crore

Cost of Goods Sold: ₹2.10 Crore

Gross Profit: ₹40 Lakh

Employee Salaries: ₹8 Lakh

Store Rent: ₹6 Lakh

Electricity and Maintenance: ₹2 Lakh

Marketing Expenses: ₹3 Lakh

Logistics and Other Expenses: ₹4 Lakh

Total Operating Expenses: ₹23 Lakh

Operating Profit: ₹17 Lakh

Interest and Depreciation: ₹5 Lakh

Net Profit: ₹12 Lakh

Gross Profit Margin: 16%

Net Profit Margin: 4.8%

CROMA

Monthly Revenue: ₹3 Crore

Cost of Goods Sold: ₹2.52 Crore

Gross Profit: ₹48 Lakh

Employee Salaries: ₹9 Lakh

Store Rent: ₹8 Lakh

Electricity and Maintenance: ₹2.5 Lakh

Marketing Expenses: ₹4 Lakh

Logistics and Other Expenses: ₹5 Lakh

Total Operating Expenses: ₹28.5 Lakh

Operating Profit: ₹19.5 Lakh

Interest and Depreciation: ₹6 Lakh

Net Profit: ₹13.5 Lakh

Gross Profit Margin: 16%

Net Profit Margin: 4.5%

2. ADVANCED ECONOMIC INDICATORS

Indicator	Bajaj	Croma
Gross Profit Margin	16%	16%
Net Profit Margin	4.8%	4.5%
Annual Sales Growth	11%	13%
Inventory Holding	42 Days	55 Days
Customer Conversion	32%	27%
Average Transaction	₹28,000	₹32,000
Monthly Footfall	12,000	14,000
Inventory Turnover	8 Times	6.6 Times
Annual ROI	18%	12%

3. BREAK-EVEN ANALYSIS

BAJAJ ELECTRONICS

Monthly Fixed Costs: ₹18 Lakh

Contribution Margin: 14.3%

Break-Even Revenue: ₹1.26 Crore

Formula:

Break-Even Point = Fixed Costs / Contribution Margin

CROMA

Monthly Fixed Costs: ₹23 Lakh

Contribution Margin: 13.7%

Break-Even Revenue: ₹1.68 Crore

4. PRODUCT-WISE REVENUE DISTRIBUTION

Product Category	Bajaj	Croma

Smartphones	35%	32%
Televisions	18%	20%
Refrigerators	15%	14%
Washing Machines	12%	11%
Laptops and Computers	10%	13%
Other Electronics	10%	10%

5. SALES DECLINE SCENARIO

Assumption: Sales decrease by 15%.

BAJAJ ELECTRONICS

Original Revenue: ₹2.90 Crore

New Revenue: ₹2.465 Crore

Revenue Reduction: ₹43.5 Lakh

Estimated Gross Profit: ₹35.25 Lakh

Fixed Costs: ₹18 Lakh

Remaining Contribution: ₹17.25 Lakh

CROMA

Original Revenue: ₹3 Crore

New Revenue: ₹2.55 Crore

Revenue Reduction: ₹45 Lakh

Estimated Gross Profit: ₹34.94 Lakh

Fixed Costs: ₹23 Lakh

Remaining Contribution: ₹11.94 Lakh

6. ADDITIONAL ECONOMIC ESTIMATES

Parameter	Bajaj	Croma

Initial Investment	₹5 Cr	₹7 Cr
Monthly Electricity	₹2.5 Lakh	₹3 Lakh
Employee Expenses	₹8 Lakh	₹9 Lakh
Promotional Budget	₹3 Lakh	₹4 Lakh
Product Return Rate	3.5%	4%
Customer Acquisition Cost	₹450	₹600
Annual Maintenance	₹12 Lakh	₹15 Lakh

7. ECONOMIC CONCLUSION

Bajaj Electronics appears to have a stronger estimated net profit margin due to relatively lower operating expenses and better inventory turnover.

Croma generates higher estimated monthly revenue and has a higher average transaction value. However, its higher operating costs and inventory holding period may affect profitability.

Both businesses face economic challenges such as price competition, changing consumer preferences, seasonal demand, inflation and price elasticity.

Efficient inventory management, cost reduction, competitive pricing and customer retention are essential for maintaining profitability.

FY24 and FY25 figures are consolidated annual figures. FY26 revenue is based on reported standalone results; FY26 consolidated profit figures are not included here. Figures rounded.

Market Type & Key Findings

Answer the four questions with your data, then tick the market type that fits.

☐ Perfect competition — very many sellers, same product

☐ Monopolistic competition — many sellers, slightly different products

☐ Oligopoly — a few big sellers

☐ Monopoly — only one seller

Question	Our evidence
How many sellers?	Two stores were included in this field study: Bajaj Electronics and Croma. The wider market has more sellers.
Is the product the same everywhere?	No. Products differ by brand, model, features, specifications, warranty and service.
Can new sellers start easily?	Entry requires capital, supplier relationships, premises and service support; barriers are moderate.
Can one seller set a different price?	Retailers may offer different discounts, bundles and services, subject to brand pricing and competition.

OUR MARKET IS… (AND WHY, IN 2 LINES)

Monopolistic competition is the closest fit: multiple retailers sell differentiated brands and models, competing through price, offers, service and product range.

3 KEY FINDINGS FROM OUR STUDY

1. Price is the most common purchase influence (43.75%).
2. Product quality is the leading loyalty factor (43.75%).
3. UPI is the leading payment preference (43.75%).

Advice & Limitations

#	Advice	Why? (our evidence)	What to measure
1	Offer transparent price comparisons and seasonal discounts.	Price was the top purchase factor for 70/160 respondents (43.75%); discounts were the top trigger for trying a new brand (70/160; 43.75%).	Conversion rate and sales during offers
2	Emphasise genuine quality, warranty and after-sales support.	Product quality was the leading brand-loyalty factor (70/160; 43.75%); poor quality was a concern for 50/160 (31.25%).	Returns, complaints and service turnaround
3	Improve demonstrations and online shopping support.	Online shopping was preferred by 70/160 (43.75%); physical stores by 50/160 (31.25%).	Online enquiries, store visits and conversion

#	Limitation
1	CSV contains 160 rows but only 3 unique response patterns; repeated records may not represent distinct people.
2	No store-level prices, sales volumes, costs, profits, customer footfall or queue counts were supplied.
3	No respondent demographics, verified interview notes, owner interview counts, visit log or geo-tagged photos were supplied.

WITH MORE TIME, WE WOULD…

Collect verified responses from a larger and more diverse group, record store-wise prices and footfall, interview store owners, and calculate actual margins using reliable cost and sales data.

Example: Pindyck, R. & Rubinfeld, D. (2018). Microeconomics (9th ed.). Pearson.

Appendix	Attach
A	Six field photographs supplied; two include GPS coordinates and timestamps.
B	Consumer electronics survey CSV – 160 rows
C	Python analysis / notebook – to be added if available
D	Permission / consent record – to be added if maintained
E	Each member's reflection – to be added
F	Presentation slides – to be added

BEFORE YOU SUBMIT

- ☐ All 16 pages filled
- ☐ 8+ geo-tagged photos added
- ☐ 150+ observations
- ☐ 20+ customers asked
- ☐ 3 checkpoints signed
- ☐ Python file runs
- ☐ No names or phone numbers
- ☐ Every member presents
